

Dear Colleague,

Autumn is nearly upon us, and that can only mean one thing ... it's nearly time for the annual Ohio Inorganic Meeting! The Miami University Department of Chemistry and Biochemistry is pleased to host this year's event at the Marcum Conference Center on the campus of Miami University in Oxford, Ohio. This year's event will be held November 9th and 10th, 2007.

As in years past, this year's event will provide an excellent opportunity for undergraduates, graduate students, and faculty to present their research, as either a poster or research talk. Given that this meeting has grown larger and larger each year, we have reserved enough space for two concurrent sessions: one for coordination chemistry and a second for bioinorganic and related research. In other words, there's no reason for you not to attend!!

I suggest you check out John Protasiewicz's site for the history of the Ohio Inorganic Meeting and a nearly comprehensive list of inorganic chemists in Ohio:

(<http://www.case.edu/artsci/chem/faculty/protasiewicz/group/OhioInorgChemistry/OhioInorganic.html>)

This site will (soon) include links to further information for this year's event.

Please send me a rough count by Sept 30 of the number of attendees, number of oral presentations, and number of poster presentations you and your students would like to present.

Also, feel free to email me with questions about this year's event or general information about the Ohio Inorganic Meeting.

Finally, two additional communications issues:

- 1 – please pass this on to any interested colleagues who may not have been included
- 2 – if you would rather not receive any further notices about this year's event, or if you wish to be taken off the distribution list completely, please let me know

We look forward to seeing you soon!

David
