

Page W. Caufield, D.D.S. Ph.D. '73

Professor
Cariology and Comprehensive Care
College of Dentistry
New York University

*Appeared on
The Discovery Channel's
"Planet Human"
and
The Food Network's
"Food Detectives" series*

- Received 27 research grants from national and private organizations
- Current research focuses on epigenetics, the transfer of bacteria from mother to infant at birth, and the importance to dental health of the first 1,000 days of life
- Authored or co-authored 80 peer-reviewed manuscripts, published more than 150 abstracts
- Instrumental in the early stages of the Cleveland Free Clinic which developed into the largest free dental clinic in Ohio

"Page has had a stellar career in science and has had a great impact on our understanding of dental caries," says Thomas E. Van Dyke, D.D.S. Ph.D. '73, the 2011 CWRU School of Dental Medicine Distinguished Alumnus of the Year.

Page Caufield receives award from Jerold Goldberg, Dean and fellow classmate, Thomas Van Dyke.

A researcher who never lost sight of the value of community outreach, Dr. Caufield performs oral examinations in a classroom in Guyana.
