

Convenient Media Services

Media Prep ✓

Dishwashing ✓

The Department of Molecular Biology and Microbiology is a basic science department focusing on the biology of microorganisms and their interactions with their hosts. We are united in applying rigorous molecular biological applications to all our studies.

We are a major participant in the Case Comprehensive Cancer Center, the Center for AIDS Research, and the Center for RNA Molecular Biology. All these activities create a vibrant and highly interactive scientific environment.

FAQs

Can people outside of the MBO department use this facility?

Yes! Our media services are available to all members of the Case School of Medicine who become registered users.

How can I start using these services?

Simple — just complete and return the attached User Registration Form

What type of media can you prepare?

The price list below includes standard media. If you require something not on the list, just bring in a recipe and we'll fill the order.

How long will it take to get my dishwashing completed, what kind of water is used?

We use triple distilled water, and each load takes 46 minutes. Most orders are completed the same day received.

How is the billing done?

Billing for Media Services (kitchen prep and dishwashing) is done on a monthly basis. Charges are journaled directly to your speedtype.

Who can I contact for more information?

About media services:

Sheryl Williams, Lab Technician, @ 368-3417

On billing matters:

Dorothy Canepari, Finance Manager, @ 368-3947

The Media Services Core Facility at the Department of Molecular Biology and Microbiology provides services related to cell culture, preparation of cell media and solutions, and glassware washing and sterilization.

The facility strives to provide services that are efficient, convenient, and cost effective to investigators.
