

Competency Evaluation Plan

Competency 1: Graduates must be competent in patient assessment and diagnosis

Educational Outcomes

1. Examine head, neck and stomatognathic system
2. Collect and interpret the medical, dental and social histories, including diagnostic aids and tests
3. Communicate with other health care professionals
4. Interpret the signs and symptoms of disease
5. Differentiate pathologic conditions from normal clinical findings
6. Develop diagnoses based upon assessment of collected data

Methods for Evaluation

Competency Evaluation Plan

Competency 4: Graduates must be competent in oral health promotion and disease prevention.

Educational Outcomes

1. Educate individual patients about the etiology and development of oral diseases
2. Educate individual patients about the treatment of dental disease and the prognosis with and without treatment
3. Provide preventive/maintenance regimens individualized to each patient's needs
4. Recognize the principles for the development, implementation, and maintenance of a recall system
5. Recognize the principles involved in community interventions to improve oral health and participate in clinical experiences in community oral health improvement

Methods for Evaluation

Competency Evaluation Plan

Competency 6: Graduates must be competent in the prevention and management of dental emergencies

Educational Outcomes

1. Recognize, treat, and manage dental emergencies
2. Recognize the need for preventive therapies for patients at risk of traumatic injuries
3. Recognize, evaluate and manage uncomplicated localized odontogenic infections and common post-operative complications

Methods for Evaluation

	Year 1	Year 2	Year 3	Year 4
EO1		DEND 221 – Didactic Exam DENC 267 – Denture Repair	DEND 328 – Didactic Exam DEND 348 – Didactic Exam DEND 378 – Didactic Exam	Clinical Competency in New Patient Eval Clinical Competency in Emergency Care
EO2		DEND 221 – Didactic Exam		
EO3		DEND 221 – Didactic Exam	DEND 348 – Didactic Exam	Clinical Competency in New Patient Eval Clinical Competency in Emergency Care

Competency Evaluation Plan

Competency 7: Graduates must be competent in the recognition, prevention and short-term management of medical emergencies in the dental office.

Educational Outcomes

1. Recognize the signs of a medical emergency
2. Assess patient risk for medical problems utilizing the health history, patient interview, and through communication with other health care professionals
3. Recognize the steps in management of medical emergencies
4. Maintain certification in Basic Life Support Techniques

Methods for Evaluation

	Year 1	Year 2	Year 3	Year 4
EO1		DEND 252 – Didactic Exam	DEND 333 – Didactic Exam DEND 352 – Didactic Exam DEND 355 – Didactic Exam DEND 378 – Didactic Exam

EO4	DEND 123 CPR Certification		DEND 333 CPR Certification	

Competency Evaluation Plan

Competency 8: Graduates must be competent in the diagnosis and management of pulpal and periradicular disease.

Educational Outcomes

1. Collect and interpret diagnostic data and determine a diagnosis
2. Perform non-surgical endodontic treatment
3. Explain the principles for the management of traumatic injuries to the tooth involving pulpal compromise and vitality

Methods for Evaluation

	Year 1	Year 2	Year 3	Year 4
EO1		DEND 221 – Didactic Exam DEND 248 – Didactic Exam	DENC 322 – Case Report DEND 348 – Didactic Exam DEND 378 – Didactic Exam Clinical Qualifying Exam in Endodontics	DENC 422 – Case Report Exam Clinical Competency in Endodontics
EO2		DENC 248 – Clinical Competency	DEND 348 – Didactic Exam Clinical Qualifying Exam in Endodontics	Clinical Competency in Endodontics
EO3			DEND 348 – Didactic Exam	

Competency Evaluation Plan

Competency 9: Graduates must be competent to diagnose, prevent, treat, and manage periodontal disease.

Educational Outcomes

1. Identify and manage periodontal risk/etiologic factors
2. Evaluate and diagnose the periodontal condition of patients
3. Perform dental prophylaxis and scaling and root planing
4. Demonstrate and evaluate proper home care procedures
5. Evaluate the outcomes of treatment

Methods for Evaluation

	Year 1	Year 2	Year 3	Year 4
EO1	DEND 121 – Didactic Exam		DEND 328 – Didactic Exam DEND 360 – Didactic Exam DEND 378 – Didactic Exam Clinical Competency in S/RP	DEND 421 – Didactic Exam DEND 430 – Didactic Exam Clinical Competency in S/RP Clinical Competency in Evaluation of Tx

Competency Evaluation Plan

Competency 10: Graduates must be competent to treat dental disease and to repair defects with restorations and prostheses that are developed to conform to the anatomic, functional and esthetic requirements of patients.

Educational Outcomes

1. Evaluate teeth and supporting structures, assessing prognosis, and develop plan for care
2. Identify and remove carious tooth structure and defective restorative material
3. Restore/replace teeth with dental materials based on requirements for form, function and esthetics
4. Prescribe laboratory fabrication of fixed or removable prostheses, recognize when modification is necessary
5. Describe principles of osseointegration and refer patients for evaluation

Methods for Evaluation

	Year 1	Year 2	Year 3	Year 4
EO1	DEND 162/163 – Didactic Exam DEND 172 – Didactic Exam	DEND 267 – Didactic Exam DENC 267 – Lab	DEND 360 – Didactic Exam DEND 363 – Didactic Exam DEND 378 – Didactic Exam Clinical Qualifying Exam in Tx Planning	Clinical Competency in Tx Planning Clinical Competency in Pediatric Dentistry

EO5		DEND 269 – Didactic Exam DENC 269 – Lab	DEND 328 – Didactic Exam DEND 360 – Didactic Exam	DEND 430 – Didactic Exam Clinical Competency in Extraction/Biopsy

Competency Evaluation Plan

Competency 11: Graduates must be competent in the management of peri-operative pain and anxiety.

Educational Outcomes

1. Prescribe medications for the control of pain and/or anxiety
2. Demonstrate effective local anesthesia techniques, and manage local anesthesia failures
3. Manage patients with anxiety and/or refer patients requiring special treatment
4. Demonstrate effective behavioral management techniques

Methods for Evaluation

	Year 1	Year 2	Year 3	Year 4
EO1		DEND 252 – Didactic Exam	DENC 332 – Didactic Exam DEND 348 – Didactic Exam DEND 355 – Didactic Exam DEND 378 – Didactic Exam	Clinical Competency in Extraction/Biopsy

Competency Evaluation Plan

Competency 15: Graduates must demonstrate their comprehension of practice management skills and business protocols that meet the needs for oral health care delivery.

Educational Outcomes

1. Demonstrate skills as the leader of the health care team
2. Manage patient information
3. Demonstrate knowledge of risk management and quality assurance
4. Evaluate different models of oral health care management and delivery
5. Evaluate various practice configurations
6. Demonstrate use of information technology resources in contemporary dental practice

Methods for Evaluation

	Year 1	Year 2	Year 3	Year 4
